

## LIGHT AND SHADOW IN DRAWING

### 1. Understanding Light Source

- Every object reacts to light depending on where the light is coming from (top, side, front, back).
- Use an arrow to mark the light direction in your drawing.

**Highlight**

Brightest spot where light hits.

**Midtone**

The natural color of the object.

**Core Shadow**

Darkest part of the object.

**Cast Shadow**

Shadow projected onto another surface.

**Reflected Light**

Light bouncing back into the shadow side.
